European Standards
Slovak Standards
European Directives
Government Regulations

Description and function of the product

The electrical insulating blanket made on the basis of synthetic rubbers is a flexible covering material used to cover conductors that are under voltage. It is intended to protect workers from accidental contact with live electrical wires, equipment or circuits, or grounded electrical wires, equipment or circuits and to prevent short circuits in electrical installations.

A. The specified product is safe for its intended use and measures have been taken to ensure compliance of all products placed on the market with the technical documentation, with the basic requirements of the government regulations that apply to it and the requirements of the technical regulations listed in point B.

B. The properties of this product meet the technical requirements that apply to this product and that are stated in the relevant government regulations, or in other /further/ technical regulations.
